

KONOVA K-ARM TRIPOD STABILITY ARM FOR SLIDER

Increase Stability when Mounting Slider on Single Tripod

Effective solution for stable slider shots without the need for two tripods.

Fast and easy to mount. Simply screw the 1/4" thread to the slider end and clamp other side to the tripod leg.

Extendable arm allows for horizontal and angled positions, as well as use of different length sliders.

Universal compatibility with virtually all sliders. Any slider rail with a 1/4" thread on the end will work.
